MOST LUXURIOUS SPACE
CRUISER OF THE MILLENIA

THE **LAZARUS** DESTINATION MARS TVC5Z

- // Full 0.8G comfort
- // Private VR chambers
- // Exclusive Space Bar access
- // Weightlessness events
- // Full contact experiences

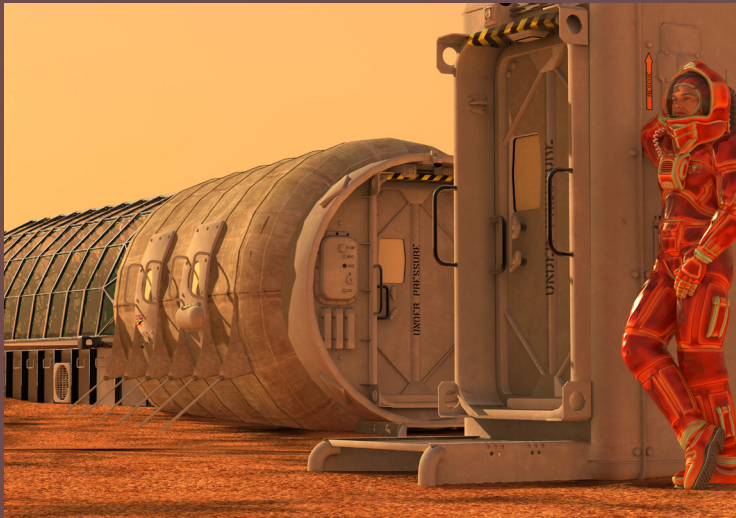

We look forward to welcoming you aboard the **LAZARUS**
on the first human cruise to our Mother planet.

Drone work on the luxurious space cruiser **LAZARUS** is almost complete. By late TVC52 (2552) she will be setting off on her maiden reality voyage to circumnavigate Mars. We are inviting you to join us on what is sure to be a memorable trip. This nostalgic themed space cruise is designed to take you back to the golden age of space travel. A reality voyage transporting you and your fellow passengers 200 Km across open space in the utmost luxury. In the spirit of those ancient space adventurers there will be no V-World access and limited connection to Mother's servers. Instead we will have something for every real world adventurer to make their trip both memorable and nostalgic.

The space cruiser **LAZARUS** took eight years to build and is the pinnacle of luxury space travel. It is fully droned for your convenience with an experienced human crew offering the perfect balance between human interaction and peaceful relaxation. It's essential to book early as cabin numbers have been reduced for this maiden trip and are restricted to only 350 guests. Our sophisticated drone team will be available to serve you 24 hours a day whether that's Holo service inside your luxurious cabin or nostalgic simulations within the public areas.

CELEBRATE SPACE TRAVEL FROM THE MOONAGE

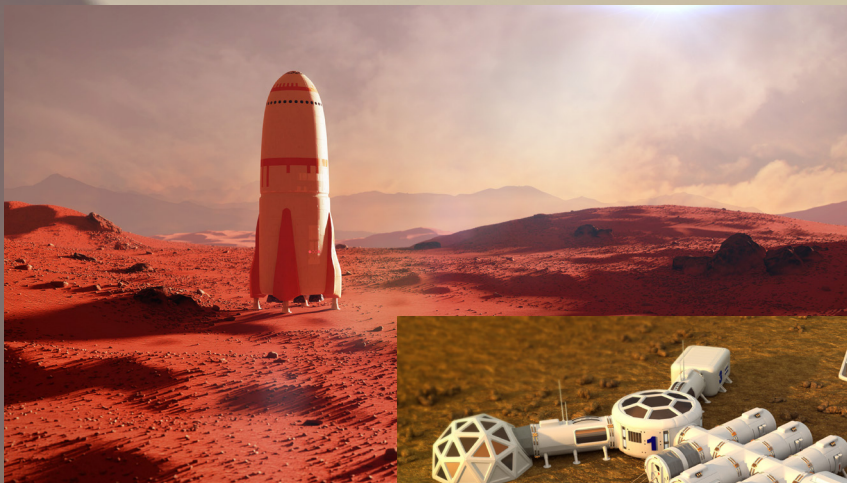

— THE ATRIUM & SPACE BAR

The central atrium of the ship is where you'll find much of our entertainment and communal space. Here you can mingle with your fellow adventurers, visit the numerous gambling houses, enclosed VR chambers and much more. The highlight is the 'spacebar' with its incredible augmented glass floor. The ship's artificial gravity is created by spinning the enormous barrel shape, the floor of glass means you can literally dance on the stars every night. You'll also find themed cabaret, adventure gaming tournaments and an exclusive dining experience.

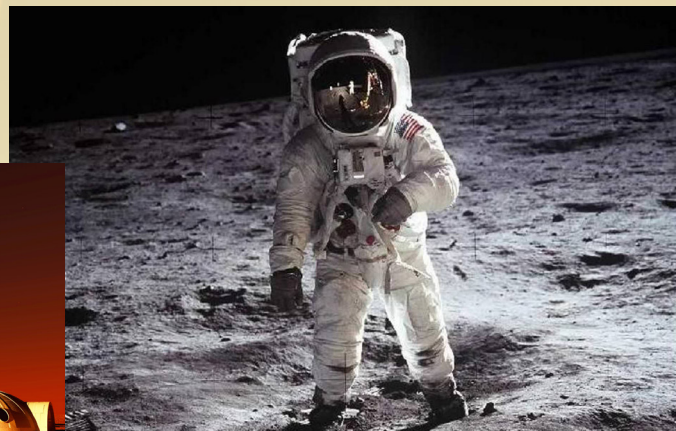

— THE MOONAGE DAYDREAM

Throughout the voyage we will pay homage to the early pioneers of space exploration. Influencers and alcohol are fully included with drone service. Be sure to sign up to some of our specialist events, join a weightlessness group for a fun session at the ship's core or maybe hook up with some of your fellow passengers and try one of our physical full contact sexual pleasure sessions, all safe and supervised by our qualified staff.

TRAVEL

DESTINATION MARS

Our destination is our nearest and most precious planet Mars. We will orbit the red planet for two sols before heading home. Plenty of time to get those 2D and 3D momentous images. For those wanting something more why not pre-book one of our direct augmented connections to the surface drones. Expect to arrive refreshed after the ship's super efficient nuclear ION drive unit has whisked you smoothly across 200 million kilometres. All whilst enjoying a natural and comfortable gravity of 0.8G once aboard ship.

SERVICE

Onboard service is second to none. The Lazarus is equipped with an army of humanoid and integrated A.I. drones. They will be on hand to serve you night and day with your every desire. Our drone chefs are programmed with recipes by some of Heathen's legendary food artists. Food, beverages and influencers are all complimentary throughout the voyage. No need to bring your Sage or Makers, everything on this trip is created for the real world experience.

—ACCOMMODATION

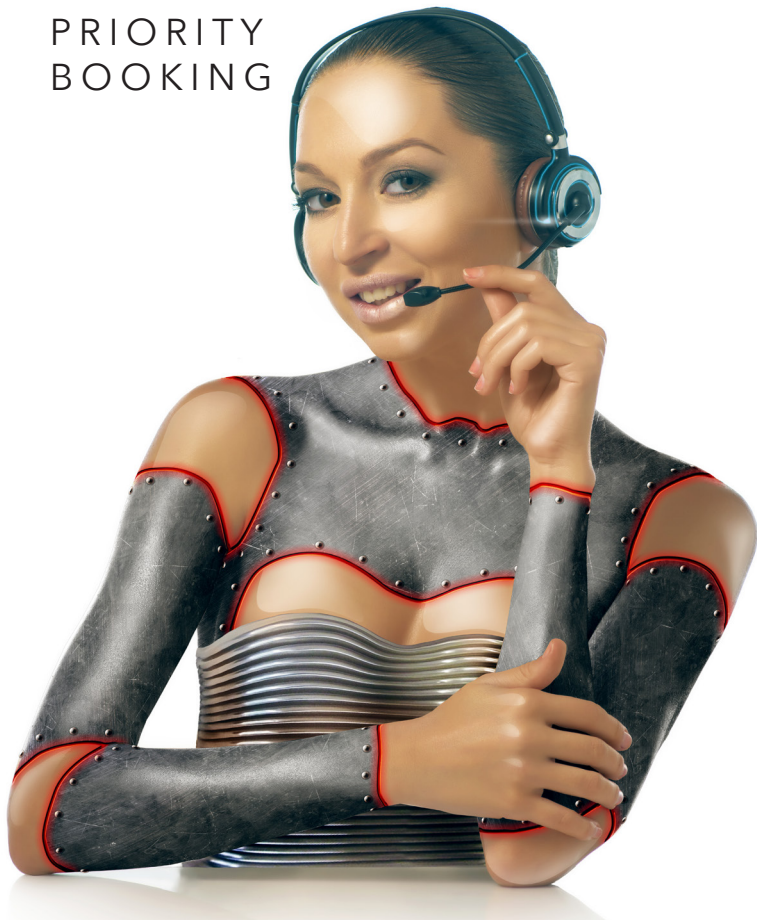

All suites are the height of luxury and include a dedicated humanoid drone, available 24 hours a day. Luxurious sleeping arrangements include king size beds and augmented lighting system to simulate Earth time. Each sleeping area includes drop down radiation shelters. The walk in wardrobe also doubles as a radiation shelter and A.I. emergency life raft device for your comfort and safety.

—ORIENTATION

With the ship rotating to produce a comfortable 0.8G the outside window is in the floor. However to help with orientation there will be an augmented wall window with an outside view. Although the ship doesn't offer full V-World capability it does enjoy local augmentation. There will be a large holo screen in every suite for your convenience.

THE **LAZARUS**

PRIORITY
